New Features:

- 726787 Add in an option in [System Setup]-[Terminal Setting]-[Hold Sales and Multi Printing Setting] check Print After Hold Sales (Each Item Per Page) to enable printing receipt per quantity in a single receipt.

Bug Fixes and Minor Changes

- 720324 In Store Procedure [PfPosKitchen] the PrinterName in AcMultiPrinter is changed to PrinterDescription.
As results, the hold kitchen report will print out AcMultiPrinter's printer description instead of printer name which is not much information.
- 720144 Change AcUom Table [EditBy] Column to datatype nVarChar(10).
- 720944 Fix when user change table, the previous table number is captured and will print out in transfer table slip.
- 720921 Fix calculation error when insert negative quantity in Card Group Discount.
- 720090 Fix Client Socket will delete picture path when the user chose to fresh download all.
- 721484 Fix member screen create member will prompt error.
Member number also being forced to unique in all the outlets using unique counter prefix.
- 721276 Fix after choosing a customer in card file screen, the UomPrice will change.
- 721275 Fix Multiuom not downloaded to TouchnPos database

3.9 Version 2011.3

New Features:

- 719481 Reindex function has been add in TouchNPos in [Function]-[back-up]
- 719408 Client Socket will check the license compatible with the product itself.
If the product purchase is One Series, then the full version socket is not allowed to download for One Series database.

- 718907 In multi receipt printing, now it can save default receipt format.
User no longer needs to choose which receipt format to use when using multi report printing mode.
- 716541 Add in Magnetic Stripe Reader setting in system-setup to let user choose either track1 or track being used in magnetic card reading.
- 717319 Optional to upload modifier details. Can be set in TouchNPos Setup-> Terminal Setting.
- 719464 In Cash Count Report, add in field of Voucher and Coupon Amount.
- 716865 Added an option to select capture full credit card number or mask the credit card number.
In TouchNPos [System Setup]-[MISC]-[Magnetic Stripe Reader Setting]
add an extra check-box to let user mask first 12 digits of credit card number.
- 717635 Add a new check-box in system setup as a master key to enable/disable button visibility in TouchNPos, such that easy for trainer to train when switch version between TouchNPos(Full), OneEz, OneF&B.

Bug Fixes and Minor Changes

- 719054 Fix Cash Count Is Not Closed will Upload To SmartBizSQL.
- 719482 Add closing report to include total pax, total bill, Average pax per expenses, average per bill to print out when close counter
- 716350 New report format of Daily Collection will show 0.00 for blank data chosen.
The from date and to date be modified to select data range other than showing 01/01/1001
- 719358 Fixed OneFNB setting [Function]-[System Setup]-[Terminal Setting]-[Detail Setting]-[Delete Item Control OnHoldSales] will automatically untick in TouchFNB.
- 717155 CD version 6.60008 found got 2 erros prompt out. One of the message come from I center.
Another is TNP socket server, However, TNP socket server if using default 8099 port, restart PC, no error. If create more socket (8098 and etc) it will come the message.
- 719093 Fix Modifier error when save new picture attached.
- 719333 Fix some of the button visibility that work correctly on TouchNPos but do not work on OneEz and OneF&B.
Some button layouts are not following default version has be solved.
- 719081 Fix Kitchen List Printing Do Not Follow Sequence
Change pfRpPosKitchen store procedure to sort by ItemNo.
The result is Kitchen item printing will follow the sequence of ItemNo which is same as ordering screen.
- 719808 Fix One Series Stock category > create new > press arrow left > error prompt out Steps to reproduce: create new category > in description field > press arrow left > the error prompt out.
- 719127 Password checking will include blank password. Previously blank password will pass through password checking, especially kick drawer function.
Now blank password no longer passes through password checking.
- 719359 Fix Function button cannot be used although all access right is assigned.
After use the OneEZ and direct activate to OneF&B without changed the Running as OneF&B then this problem will happen.
- 718274 In [Function]-[User]-[Restriever Sale], uncheck the user right [Delete hold Sale] to avoid cashier to delete hold sale.
- 718576 Some of the customers are confuse between [ItemAmount],[ItemAmountModifier] in the receipt. Now they are same.
- 719004 Fix kick drawer function when TouchNPos linked to LPT port.
- 719478 Added control to existing member profile in TouchNPos, and it only allow to edit if the record has not been upload to backend.
Record that had been uploaded can be edit only in backend.
- 717787 User now is not able to reserve on the same table and on same time which has been reserve by another user previously.
- 717489 OneEz. For each individual stock item discount, there is no report to show the discount amount. If item A is given discount, Daily Summary report show only discounted amount and no sign or marking on the report. However Daily Summary report show payment discount - by whole bill.
- 717786 Fix table status Do Not High Light During Reservation Time.

717635 Touch&Pos - Button Visibility. In OneEz, at the user maintenance, the feature can be enabling. However, it is not able to set at [Function]-[Setup]-[Detail]-[Misc]. Suggest allowing this feature in OneEZ and it would convenient trainers to train.

As result, in TouchNPos [System Setup]-[Advance Setting]-[Access Function], ticked this check-box to make sure the entire button layout as original version.

3.10 Version 2011.2

New Features:

- 718591 Compile Standard Report format to include previous deposit column.
