1 DynaMod

1.1 Version 2018.1

New Enhancements

- UI (User Interface) components had been upgraded for entire system. (Eg: Grids, Pivot etc)
  - Improved data in grid loading time.
  - Improved data in pivot loading time.

Closed Issues

- Remove the 'Accept' button in Supplier Price Comparison.

- Fix wrong spelling on Cash Sales Full Tax Invoice screen.

- Fix Customer/Supplier still be able to input in transaction screen even if already inactive.

1.2 Version 2018.1 Build 0001
*Note: Please update DynaMod Server Socket to 2018.1 Build 0001 or above.

New Enhancements

- Singapore GST: Added New Tax Codes (SRCA-C, SRCA-S, TXCA)

- Enhanced POS Sales Summary report by include POS Deposit Collection records if any. Please note that deposit do not consider as Sales, as such to get the deposit collection figure.
  - Please pull out the column AmountDepositCash, AmountDepositCard, AmountDepositOther.
  - New column RecordType would be either "Sales" / "Deposit" to differentiate the corresponding records.

- Added shortcut keys to all report screens.
  - Print: Alt + P
  - Preview: Alt + R
  - Clone: Alt + N
  - Edit: Alt + E
  - Delete: Alt + D
  - Close: Alt + C

- Added Combine Member Point setting between DynaMod under Member Module -> Setup -> Member Setting. When this option is enable, the member point in all the data source in Member Purchase History Source will be combine and all purchase history will also able to view in Member Point Enquiry and Point Statement Listing.

- Added Exclude Success Record when loading record in Validate POS Sale Failed Upload Transactions.

- Added Recalculate Old Quantity in Stock Take to recalculate the old quantity and variance quantity base on new quantity.

Closed Issues

- Fix encountered error "Error converting data type varchar to datetime." when Save IRAS Audit File (IAF) in Singapore GST Simulation.

- Migration Wizard: Handled Stock Price 2 to 5; CommissionByAmountStockPrice 2 to 5; CommissionByPercentStockPrice 2 to 5 by set to zero figure if multiuom because SmartSQL doesn't support it.

- Fix Member Point Balance may appear as zero and need to perform recalculate member point.
